

Architectural Services for Contractors

from GMT Home Designs

GMT Home Designs can help you take your residential construction business to the next level.

Our architectural design services help contractors find new customers, sell them on the design/build approach, and then produce accurate 3D renderings and cost estimates to accelerate the sales, design and construction phases of every project. Ultimately, our skills and tools help our contracting partners win more business.

GMT Home Designs' principal designer and owner, Glenn M. Travis, offers more than seventeen years of experience in architectural design and engineering. We combine this professional experience with state of the art technology to offer our contracting partners the edge:

Design Services using Chief Architect

We execute our design work using Chief Architect, a powerful home design software program, which allows us to create detailed custom plans and blueprints with complete materials lists. We can also quickly produce dramatic, photo-realistic renderings that will make a powerful impression on your clients, and we can make changes on the spot during a client presentation to ensure that your customers are getting what they want. We can provide the needed REScheck (In Massachusetts — MAScheck) Compliance Certificate Energy Code information for all projects as well.

Estimating — HomeTech Advantage Project Estimator

This excellent software package works hand-in-hand with Chief Architect to provide quick, accurate and professional estimates for any project. We can generate many different types of summary, cost and price reports for you and your clients.

Design/Build Sales Services

Consumer demand for design/build services is on the rise - yet selling these services is difficult without a detailed understanding of the design/build process and the real benefits it provides. We provide design/build sales on a consultation basis. We place a great emphasis on listening to the customer to make sure their needs and desires are being heard, and also on providing a customer-centered explanation of design/build.

Our design projects include all design/build projects, new homes, renovations, additions, kitchens and baths, townhouses and apartments, condo conversions, accessible (barrier-free) design, and more. Call us today to discuss how GMT Home Design's services can aid you in building your residential construction business.
